# SOCIAL SCIENCE **RESEARCH FROM THE**

# animal welfare program

Since the beginning, the Animal Welfare Program has used a range of tools from the social sciences to bring together experts (farmers, veterinarians, scientists, animal advocates) to identify new solutions to problems in animal industries. The timeline below highlights theses from our program from this area of research. For additional information, click the title, or follow the links below. \*

#### 2018

Promoting farmer and veterinarian cooperation to improve dairy calf welfare (16) By Sumner, Christine

# 2017

Use and perceptions of the emergency slaughter program in British Columbia (14) By Koralesky, Katherine

#### 2014

Understanding humane expectations: public and expert attitudes towards human-wildlife interactions (12) By Dubois, Sara

#### 2013

The rehabilitation of black bears (Ursus americanus) in North America: a survey of current practices (10) By Cant, Meghann

#### 2012

The use of animals in science: trends and public attitudes (8) By Ormandy, Elisabeth
